(a) $\theta = 0.20$ (circles) and 0.25 (squares)
FFGN, $\theta = 0.2$
FFGN, $\theta = 0.25$
powerlaw, $\theta = 0.2$
powerlaw, $\theta = 0.25$
exact fGn, $\theta = 0.2$
exact fGn, $\theta = 0.25$
$\alpha_{\text{eff}}$ from consecutive $L$ pairs
$L$ (pair midpoint)
(b) L-independent ⇒ no crossover resolved
$\Delta H(\theta, L)$ at fixed $\theta$
$L$
(c) $\alpha(\theta)$, bootstrap errors over runs
Medina one-loop LR
Squizzato--Canet NPRG
FFGN
powerlaw
exact fGn
$\alpha$
$\theta$
(d) floor shrinks with $L$: confound for onset drifts
split-half null floor of $\Delta H$
$L$
