(a) α vs nominal θ (L = [64, 128, 256])
FFGN (published generator)
spectral (θ-continuous)
α
nominal θ
(b) α vs effective θ
FFGN
spectral
α
effective θ (binarised, calibrated)
(c) θ axis: FFGN never enters θeff < 1/6
effective θ
nominal θ
FFGN
spectral
no offset
(d) L = 256: FFGN jumps and inverts the trend
pflat
